SMART FUNCTIONS FOR EVERYDAY USE

Selected functions support air quality, heating performance, energy-saving and simple control across different spaces.

Air quality & self-cleaning

AIR IONISER

Releases ions into the airflow to help create a fresher feeling of air in the room and support a more comfortable indoor environment.

FROST CLEAN

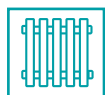

Uses cold expansion technology to freeze moisture on the heat exchanger, helping remove dust and impurities during the cleaning cycle.

56°C STERILISATION

Uses a high-temperature self-cleaning cycle to help keep the indoor unit cleaner and support a fresher indoor environment.

Comfort & heating performance

SUPER HEATING

Supports dependable heating performance in low outdoor temperatures, with selected models operating down to -25°C. Designed to help maintain comfortable indoor temperatures throughout the heating season.

AI HUMIDITY CONTROL

Automatically adjusts operation to help maintain a comfortable indoor humidity level and improve everyday room comfort.

INTELLIGENT EYE

Detects presence in the room and adjusts operation according to room conditions, helping support more efficient everyday use.

Energy saving & control

ECO+

An advanced energy-saving function that automatically optimises operation according to room conditions and usage, helping reduce energy consumption while maintaining comfort.

WI-FI

Allows the air conditioner to be controlled remotely via smartphone or tablet, making everyday temperature control easier.

I-REMOTE

I-Remote enables upper and lower temperature limits to be set, helping keep the room temperature within a selected range and supporting more controlled energy use.

The right Maxon model for every space

From heating performance and air quality functions to smart control and energy-conscious comfort, the Maxon range helps match each space with the right solution.

PREMIUM BLOOM

Powerful comfort for demanding conditions.

Premium Bloom is designed for year-round comfort, with strong heating performance down to -25 °C and efficient cooling during warmer months. With 3D airflow, Wi-Fi control and ECO+ operation, it helps maintain a stable and comfortable indoor climate through every season.

COMFORT PREMIUM

Smart comfort with advanced control.

Comfort Premium is designed for users who want more precise control of temperature, humidity and energy use. With AI Humidity Control, Intelligent Eye, ECO+ and I-Remote, it adapts operation to room conditions and supports a more comfortable everyday climate.

COMFORT PURE

Fresh air feeling with added hygiene functions.

Comfort Pure combines reliable cooling and heating with functions designed to support a fresher indoor environment. Air Ioniser, UVC technology, 56 °C Sterilisation and Frost Clean help maintain a cleaner indoor unit and a more comfortable feeling of air in the room.

FRESH PLUS

Everyday comfort without overcomplication.

Fresh Plus is a practical wall-mounted unit for homes, apartments and smaller spaces. It offers reliable cooling and heating, Wi-Fi control, ECO+ operation and useful comfort functions for simple everyday use.

ECO GREEN

Efficient comfort for everyday use.

Eco Green is a practical choice for users looking for reliable cooling, heating and simple control. With Wi-Fi, Frost Clean, Low Ambient Cooling and Auto Restart, it offers the core functions needed for comfortable residential use.
